

Best Practices – Cholesterol Management Workflow

Cholesterol Management Best Practices: Statin Initiation Algorithm, Monitoring Statin Use, Intensity of Statins

Recommended Risk Calculators:

1. ASCVD Risk Estimator: <http://tools.acc.org/ASCVD-Risk-Estimator/>

2. Framingham Risk Score

<https://www.framinghamheartstudy.org/risk-functions/cardiovascular-disease/10-year-risk.php#>

Chart Prep Team:

- Follow Cholesterol Management Best Practices
- Calculate ASCVD Risk Score: Intervention Group – High risk patients, or patients scheduled for an Annual Physical Exam
- Check for Blood Work
- Flag chart for PCP

Intake Team: MA/LPN

- Follow Cholesterol Management Best Practices
- Confirm Statin use / Record Adverse Effects
- Monitor Statin use
- Update Chart: If Statin Intolerant (T46.6X5A), GI Bleed (K92.2)

PA/NP/MD/DO:

- Follow Cholesterol Management Best Practices
- Recommend Intensity of Statin Therapy
- Review recommendations, if Statin Intolerant
- Interpret Results.
